

Attaching Your BBQ Guru Adaptor Door to Your Kamado Cooker

The Kamado adaptor door has two locking pins designed to precisely fit into the existing Kamado damper tubes.

Locking Pins

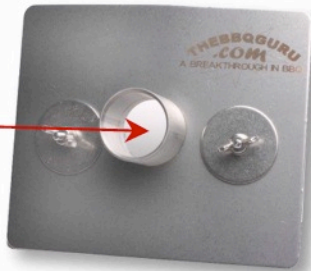

Wing Nuts

Place the adaptor door into the kamado draft door/cleanout inlet.

While applying pressure to the adaptor door to compress the gasket against the cooker, tighten the wing nuts to set the locking pins.

Inducer Sleeve

We use high temperature adhesive foam to ensure a tight seal on your grill/smoker.

Finally, place your BBQ Guru fan nozzle into the inducer sleeve.
You are now ready to cook!

This adaptor door fits the #5, #7, and #9.
If you have a #3 or an older model Kamado,
please call or email us and we will make a door
for you at no extra charge.
