

Small BGE Grill Instructions

Small BGE Adaptor Door Installation

Parts Needed:

- BGE Adaptor Door

Prep your Guru/BGE Adaptor Door for the installation.

Start by sliding existing BGE draft door out of the damper track completely.

Slide your Guru/BGE Adaptor Door into the damper track until Adaptor Plate fits up against the track stop tab.

You are now ready to cook.

NOTE: Run your probes into your cooker under the lid or through your top damper. Never run them through the firebox or bottom damper.

This adaptor was designed to fit into the original small Big Green Egg draft door track with no modifications. It is easy to install and remove for easy clean-out. Comes with high-temp silicone kill plug.

IMPORTANT: If you have a medium, large, or XL Big Green Egg, this adaptor will not work. Please choose the Ceramic Style Adaptor instead. This adaptor can be found on BBQGuru.com.
